PROFILE

Motivated and self-taught individual with a background in translation and communication, who has transitioned into the IT field through independent study and intensive mentorship. Over the course of one and a half years, I was mentored from zero IT knowledge to the level of a software architect capable of working independently — as acknowledged by my mentor. I hold solid knowledge in Linux, Bash scripting, Regex, and databases, and have hands-on experience with modern full-stack technologies and AI-assisted development workflows. Committed to continuous professional growth.

TECHNICAL EXPERIENCE

Observer & Junior Developer
